Harmonize offers built-in access to Turnitin’s plagiarism detection software, Turnitin Similarity, to help instructors check the authenticity of their students’ work directly from the Harmonize discussion platform.

Instructors who use Harmonize will now be able to review student work, including discussion posts, against Turnitin’s comprehensive collection of internet, academic, and student paper content.

Provide feedback to help students learn

Harmonize unites instructors and students in a shared learning experience that inspires participation and discussion. Turnitin integrates seamlessly with Harmonize and allows instructors to provide feedback on student work that’s been flagged for potential plagiarism. Instructors can have more productive conversations with their students about how to improve their submissions.

Simple reports for quick results

Color-coded reports are easy to interpret and offer side-by-side comparison to original sources. You can also apply filters and exclusions to surface more relevant results.
Promote self-directed learning

Unlimited student submissions encourage students to check their own work as they continue to learn how to handle sources, summarize information, and prepare original work to be shared with their peers and instructors online.

A Trusted Provider

Turnitin processes 1 million submissions per day and serves 81 of the world’s top 100 universities.

Ready to learn more?

Harmonize seamlessly integrates with LMSs to create an interactive space for dynamic academic discussion, creative and analytical thinking, and in-depth feedback that drives next-level education.
